Personal Statement

As a recent graduate from a Full Stack Web Development Bootcamp, I am eager to begin my career as a Junior Full Stack Web Developer. I am passionate about utilizing technology to address real-world challenges and enhance user experiences.

My goal is to leverage my technical expertise and fresh perspective to contribute to innovative projects and deliver high-quality solutions. I am committed to collaborating effectively within development teams and continuously growing my skills in dynamic work environments. I look forward to bringing my enthusiasm and dedication to a forward-thinking organization and contributing to its success.

Skills & Abilities

HTML, CSS, JavaScript, Bootstrap, Node, Express, Postgres, MongoDB, and React.

Applications

'Book Buddies'

Experience

OWNER | SELENA PIXTON HAIR | MARCH 2022 – DECEMBER 2023

- Proprietor and owner of a local beauty studio.
- Designed and executed online and digital marketing campaigns in order to attract new clients.
- High retention rate among customers and positive word of mouth resulted in a strong and growing business.

BOOK BUDDIES | CODING BOOTCAMP

- Developed (as part of a 5 person team) 'Book Buddies, a Full Stack book club application. Using Express, I was able to develop multiple API Routes, define attributes of different data entities, their relationships with each other, and worked on how they would be stored in the PostgreSQL database. I also used Handlebars and CSS to get multiple features to render and apply the styles that I coded.

Education

TEXAS BARBERING AND COSMETOLOGY LICENSE – EXPIRES MARCH 2026 | GRADUATE OF PAUL MITCHELL THE SCHOOL PROVO | OCTOBER 2021

- o Coursework in cosmetology, barbering, esthetics, and nails programs. Completed 1,600 hours of practical work prior to graduation and certification.

CODING BOOT CAMP CERTIFICATE OF COMPLETION | SEPTEMBER 2024 | THE UNIVERSITY OF TEXAS AT SAN ANTONIO

- o Relevant Coursework: fundamental concepts of web development, HTML, CSS, JavaScript, application development using third-party APIs, including full stack applications.
